PROJECTS

SoundRiver
HTML / CSS / JAVASCRIPT
A web application that is a one-stop shop for streaming audio/video from your favorite musicians. Uses APIs from multiple platforms to consolidate relevant content for the inputted artist and title. Allows user to save songs in multiple playlists and play the content directly from the application. This was a collaboration between myself, Ali Baker, and Jessie Doherty. Their contact information is included in the project README.

🌐 https://james-y-wong.github.io/SoundRiver

Weather Dashboard
HTML / CSS / JAVASCRIPT
A web application that provides the user currently weather conditions, as well as 5-day forecast for the city searched. Search results will be saved in search history section and be easily viewed again on a click.

Workday Scheduler
HTML / CSS / JAVASCRIPT
A web application that assists the user in planning out their workday. The user is able to input tasks in time blocks and save to local storage. When the page refreshes, the previously entered task will remain. The time blocks are color coded depending on what time it is during day.
